Reviewer's report

Title: Chronic kidney disease care delivered by U.S. family medicine and internal medicine trainees: Results from an online survey

Version: 2 Date: 31 October 2006

Reviewer: Giuseppe Remuzzi

Reviewer's report:

General

The manuscript by Lenz et al. has been modified according to my previous concerns. Importantly, answers of a positive control group of nephrology attendings and fellows have been collected. However, given the small number of responders, I do agree with the Authors that it makes no sense to include them in the analyses. Nevertheless, it might be of some interest to find these results in the appendix.

------------------------------------------------------------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

Which journal?: Appropriate or potentially appropriate for BMC Medicine: an article of importance in its field

What next?: Accept for publication in BMC Medicine without revision

Quality of written English: Acceptable

Statistical review: No
