Reviewer’s report

Title: Corticotrophin Releasing Factor 2 Receptor Agonist Treatment Significantly Slows Disease Progression in MDX Mice

Version: 2 Date: 28 March 2007
Reviewer: Jeffrey Chamberlain

Reviewer’s report:

General
I think the work is very interesting and well done. I have no further comments for the authors.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
