Reviewer’s report

Title: Gestational diabetes as a risk factor for pancreatic cancer: A prospective cohort study

Version: 3 Date: 18 April 2007

Reviewer: Dominique S Michaud

Reviewer’s report:

General
The revisions are satisfactory.

However, I do believe that adding person-time data to the tables would be useful since the HR are based on rates and these reflect both number of individuals at baseline and time of follow-up, censoring, etc.

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
