Reviewer's report

**Title**: miR-124a and miR-137 inhibit proliferation of GBM cells and induce differentiation of tumor stem cells

**Version**: 4 **Date**: 8 February 2008

**Reviewer**: Setha Douc-Rasy

**Reviewer's report**:

The authors have taken into account all my previous comments and they have modified in accordance with my suggestions except for one (a supplementary data related to control experiments that should be shown in the main text). I have no objection to this coming. However, there is a very small extra remark: at p10, line 5: (Scheffler et al., PNAS, 2005) should be deleted because it refers to ref 19 cited before and after.

So it is worthwhile that the paper will be accepted for publication in BMC Medicine.
