Reviewer's report

Title: Lack of association of two common polymorphisms on 9p21 with risk of coronary heart disease and myocardial infarction

Version: 3 Date: 5 June 2008

Reviewer: Qing Kenneth Wang

Reviewer's report:

The results from this manuscript suggest that the long-term risk of 9p21 SNPs to CAD and MI is minimal. The manuscript is interesting and offers a different perspective on the relationship between 9p21 SNPs and CAD/MI. I have no more comments.

Which journal?: Appropriate or potentially appropriate for BMC Medicine: an article of importance in its field

What next?: Accept for publication in BMC Medicine without revision

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
