Reviewer’s report

Title: Quality of medication use in primary care: mapping the problem, working to a solution - a systematic review of the literature.

Version: 3 Date: 7 August 2009

Reviewer: Rodney W. Hicks

Reviewer’s report:

Second Review Comments

I appreciate the work that the author team has done on the revised manuscript. I am submitting these revised comments.

The paragraph on page 4 (beginning with It is generally)… is excessively long and contains multiple subjects. This can be separated into at least 2 paragraphs.

Page 5. In industrial settings, there is a range of….. The authors say some have been used in medication error. The author should name at least two or three rather than just provide citation. The discussion in the last of the document does this.

The authors are commended for the work

Which journal?: Appropriate or potentially appropriate for BMC Medicine: an article of importance in its field

What next?: Accept for publication in BMC Medicine after minor essential revisions

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
