Reviewer’s report

Title: Role of Lifestyle Changes in the Management of Chronic Liver Disease

Version: 1 Date: 28 December 2010

Reviewer: Nahum Mendez-Sanchez

Reviewer’s report:

Major Compulsory Revisions

The abstract and introduction section are redundant. Also in the introduction section the references are missing.

NAFLD Section

This section is incomplete. Also some references are missing and they need to discuss.

Chronic HCV section

This section is too short and incomplete. Therefore some references are missing and they need to discuss.

Liver Transplantation section

Page 6, first paragraph the authors mentioned that several epidemiological studies have shown that liver transplantation is associated with an increased prevalence of risk factors for cardiovascular disease, including hypertension, diabetes mellitus, dyslipidemia, and obesity, with reported rates post-transplant metabolic syndrome ranging from 43-58%. This information is true. However, most of these complications are related with the medications that those patients need.

Minor Essential Revisions

The abstract and introduction section are redundant. Also in the introduction section the references are missing.

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
