Reviewer’s report

**Title:** Role of Lifestyle Changes in the Management of Chronic Liver Disease

**Version:** 1  **Date:** 10 January 2011

**Reviewer:** Misael Uribe

**Reviewer’s report:**

Major compulsory revisions.

It is very important to comment a critical analysis about the quality of the information assessing these non-pharmacological interventions from an evidence-based view.

Information regarding the effect of lifestyle in liver physiology or their effect in the relationship between fat tissue and liver physiology could increase the quality of this review.

**Quality of written English:** Needs some language corrections before being published

**Statistical review:** No, the manuscript does not need to be seen by a statistician.
