Reviewer's report

Title: Exploring Urban Male Non-Marital Sexual Behaviours in Pakistan

Version: 1 Date: 3 March 2013

Reviewer: Babar Tasneem Shaikh

Reviewer's report:

Major revisions
Second sentence of the results (in ABSTRACT) needs rephrasing. It is not clear.

Explain : How the recall was handled for a bias in reporting? WHO recommends a recall of no more than 4 weeks.

Conclusion is exactly the same as given in the abstract. Here a little more elaboration as to how and through what channels, this can be achieved. Also what could be the implications, if no such interventions are employed and put in place by the state DoH or the NGOs working in this field.

Minor revisions
Again this is not explained as to why this study is being considered for publication after so many years of actual execution.

Refusals: Now this can be argued whether this much high refusal rate still leaves the study design valid or otherwise/

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
