Reviewer's report

Title: Comparison of two doses and two routes of administration of misoprostol after pre-treatment with mifepristone for early pregnancy termination

Version: 1 Date: 3 March 2008

Reviewer: Daniel Wojdyla

Reviewer's report:

Minor Essential Revisions
- Sample size computation in section 3.4.12 is for one-sided 95% confidence interval. Sentence should be amended to reflect this.

- Superscript 1 at the end of item 2.2 in Project Summary (women perception) does not have a corresponding footnote.

- Last sentence of first paragraph in 3.4.1., is +2 hours correct? Or should it be +/- hours?

- First word in page 8, should be "At".

Discretionary Revisions
- First sentence in item 3.1.1.: It would be more clear if "for medical abortion" is added after "The approved regimen".

- First sentence in item 3.4.10 is already stated in 3.4.4. Consider deleting this sentence in item 3.4.10.
