Reviewer’s report

Title: Impact of a maternal health voucher scheme on institutional delivery among low income women in Pakistan

Version: 2 Date: 2 April 2011

Reviewer: Maggie Huff-Rousselle

Reviewer's report:

This article is an important contribution to a relatively new field -- performance-based, or results-based financing -- that is need of more research. The costs of implementing the program are not discussed. This is no doubt beyond the scope of this article, but the point could be raised in the conclusions, as the scheme would have been carefully planned and implemented, which could mean the costs are high, and/or scale-up might be difficult.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
