Reviewer's report

**Title:** Efficacy of prescribed injected diacetylmorphine in the Andalusian trial: responders and non-responders evaluated using a multi domain outcome index

**Version:** 1  **Date:** 16 June 2009

**Reviewer:** Laura Amato

**Reviewer's report:**

Discretionary Revisions,
The study is well done and the methods of analysis are challenging. I only suggest in the conclusion to highlight that results come from a small sample and this limits their generalizability.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** Yes, but I do not feel adequately qualified to assess the statistics.

**Declaration of competing interests:**

I declare that I have no competing interests.
