Reviewer's report

**Title:** Comparison of heat-sensitive moxibustion versus fluticasone/salmeterol (seretide) combination in the treatment of chronic persistent asthma: design of a multicenter randomized controlled trial

**Version:** 3 **Date:** 29 November 2010

**Reviewer:** lawrence friedman

**Reviewer's report:**

This manuscript is much improved. However, there is still a problem with some of the English. Additionally, in some places, words in the middle of sentences are inappropriately capitalized. The Discussion section is shown as “Discussions.” The new table is shown as Table 1, when there is already a Table 1. More careful proofreading is needed.
