Reviewer's report

Title: The prevention of contrast induced nephropathy by sarpogrelate in patients with chronic kidney disease: A prospective randomized controlled clinical trial

Version: 4 Date: 19 November 2010

Reviewer: David Kent

Reviewer's report:

On the initial submission, we advised the authors to provide the assumptions for their power calculation. They should specify the outcome rate for CIN that they assumed in their control group when calculating the needed sample size (i.e. what is the rate of CIN that they expect in the control group).
