Reviewer’s report

Title: Exercise rehabilitation on home-dwelling patients with Alzheimer's disease - a randomized, controlled trial. Study design, baseline findings and feasibility.

Version: 1 Date: 31 August 2010

Reviewer: Simon Gilbody

Reviewer’s report:

1. Will the study design adequately test the hypothesis?
   this is a well designed RCT
2. Are sufficient details provided to allow replication of the work or comparison with related analyses: if not, what is missing?
   I could replicate this trial and there are sufficient details to describe the content of this complex intervention
3. Is the planned statistical analysis appropriate?
   exemplary
4. Is the writing acceptable?
   the writing is clear and the English is well constructed.
