Reviewer's report

Title: PRegnancy Outcomes after a Maternity Intervention for Stressful EmotionS: the PROMISES study.

Version: 1 Date: 18 April 2011

Reviewer: lawrence friedman

Reviewer's report:

I have reviewed this manuscript. Overall, it is well-written and contains the necessary information. I have just a few comments.

a) Pagination would be very helpful.

b) On the sixth page, under Assessments, there should be mention as to whether the person administering and evaluating the questionnaires will be blinded to treatment assignment. If that information is in the manuscript, I missed it.

c) Two wording suggestions: fourth page, bottom line-don’t need both “To date” and “yet”; fifth page, bottom line-rather than “implicates” use “implies”
