Reviewer's report

Title: A meta-review of heart failure disease management programs: The challenges of describing and synthesizing evidence on complex interventions

Version: 1 Date: 20 May 2011

Reviewer: John Cleland

Reviewer's report:

I thought this paper was well devised, had strong methodology and was well written with appropriate conclusions. I was missing one key paper on the topic by Harland Krumholz which I think the authors should add to the discussion

Declaration of competing interests:

I don’t have any conflicts of interest.
