Reviewer's report

Title: Assessment of data quality in an international multi-centre randomised trial of coronary artery surgery

Version: 2 Date: 19 July 2011

Reviewer: Bashir Matata

Reviewer's report:

The following are my comments:
1. The manuscript requires major compulsory revisions in terms of inclusion of findings from other international multicentre trials.

2. The manuscript requires minor essential revisions to include information on source data verification, protocol review and compliance, and audit of GCP compliance

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, and I have assessed the statistics in my report.
