Reviewer's report

Title: The OUCH study. Outcomes of Usual Chiropractic; Harm & efficacy. Measuring common adverse events and efficacy from usual chiropractic care for spinal pain. A randomised controlled trial.

Version: 3 Date: 12 October 2011

Reviewer: Charlie Goldsmith

Reviewer's report:

The pages have been numbered for 1 to 25.
1. P(age) 20, R(eference) 9 and P 21 R 26 have not used the access date in the same format as the dates on P 2 for registration. It would be better if they all could be the same format, ideally like P 2, since your date format has not been defined in the text.
