Reviewer's report

Title: Collaborative Interventions for Circulation and Depression (COINCIDE): a cluster randomised controlled trial of collaborative care for depression in people with diabetes and/or coronary heart disease.

Version: 2 Date: 12 July 2012

Reviewer: Tony Marson

Reviewer's report:

This is a well written protocol for a cluster trial that is NIHR funded and already has ethics approval.

I am happy for it to be published as it is.
