Title: Diarrhea and dengue control in rural primary schools in Colombia: Study protocol for a factorial cluster randomized controlled trial

Version: 1 Date: 16 August 2012

Reviewer: Gordon Doig

Reviewer's report:

This is a very well written protocol paper for an excellent trial. Could you please include the following details to your revised submission:

1. In your Statistical methods section, please provide references to the primary literature such that the reader can be certain that all tests used will be appropriately adjusted for clustering. Please also explain how the possible treatment interaction between the two interventions will be resolved such that the factorial nature of the trial can be resolved.
