Title: Efficacy of early neonatal vitamin A supplementation in reducing mortality during infancy: Study protocol for randomized controlled trials in Ghana, India and Tanzania

Version: 1 Date: 16 January 2012

Reviewer: lawrence friedman

Reviewer's report:

I have reviewed this manuscript. It is very well written and complete, with all key items in the protocol covered. A minor item: in several places, “data is” should be changed to “data are.”
