Reviewer’s report

Title: Thrombelastographic haemostatic status and antiplatelet therapy after coronary artery bypass surgery (TEG-CABG trial): Rationale and design of a randomized clinical trial assessing and monitoring the antithrombotic effect of clopidogrel and aspirin versus aspirin alone in hypercoagulable patients.

Version: 2 Date: 5 March 2012

Reviewer: Paul A Gurbel

Reviewer’s report:

The authors have successfully addressed all of the concerns mentioned in prior review. No additional comments.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
