Title: Efficacy of single dose Gentamicin in combination with Metronidazole versus multiple doses for prevention of post caesarean infection

Version: 3 Date: 20 February 2012

Reviewer: Allan Donner

Reviewer's report:

I have now had a chance to look at these sample size calculations. The authors have used one of several formulas that can be applied to a comparison of proportions in a superiority trial. However the authors state that they are designing an equivalence trial. If this is truly the case they should be requested to use one of the sample size formulas that have been developed for an equivalence trial along with a reference.
