Reviewer's report

Title: Mindfulness-based intervention for teenagers with cancer: study protocol for a randomized controlled trial.

Version: 7 Date: 5 March 2013

Reviewer: Andrew Vickers

Reviewer's report:

I cannot find where they justify the sample size calculation. Also note that the description of randomization does not describe the procedures to ensure allocation concealment. The authors need to state the exact procedures to prevent allocation being guessed before or changed after a patient is unambiguously registered on trial.
