Reviewer's report

Title: Nitrates and Bone Turnover [NABT]: trial to select the best nitrate preparation.

Version: 3 Date: 13 March 2013

Reviewer: Morten Karsdal

Reviewer's report:

Minor Essential Revisions

The experimental trials look very promising. I look forward to see that. Please remember that it is absolutely pivotal that participants provide morning fasting blood samples, as bone resorption markers are affected by approximately 50% by food intake.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
