Reviewer's report

Title: QUALZICE: A QUALitative exploration of the experiences of the participants from the ZICE clinical trial (metastatic breast cancer) receiving intravenous or oral bisphosphonates

Version: 3 Date: 11 September 2013

Reviewer: Lydia Bird

Reviewer's report:

It is clear that my initial understanding of what the authors were attempting to achieve in this paper was incorrect. Given their stated aim that this is a paper to inform other running similar studies then this is achieved in the manuscript. The writing is clear and comprehensive and I hope this will be of interest to the target audience. I do not think any further revision is required.

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
