Reviewer's report

Title: Tailored educational intervention for primary care to improve the management of dementia: The EVIDEM-ED cluster Randomised Controlled Trial

Version: 6 Date: 28 October 2013

Reviewer: Gail Anne Mountain

Reviewer's report:

The authors have carefully addressed all the points I raised and I am happy for the paper to be published.

Just three minor points;

I am not convinced by the explanation of co-design and suggest that the authors look for a further reference to substantiate the point or remove it.

The sentence at the top of page 14 which begins ‘The intervention practice teams….’ needs rewording.

Use of ‘&’ should be avoided.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.

Declaration of competing interests:
