Reviewer's report

Title: Pylorus resection or pylorus preservation in partial pancreatico-duodenectomy - a randomized controlled trial (PROPP study).

Version: 2 Date: 7 January 2013

Reviewer: Rakesh Aggarwal

Reviewer's report:

The manuscript states that ‘unstratified block randomization with random block sizes (10 patients per group) in a 1:1 allocation ratio’ will be done. This is somewhat unclear. ‘Random block sizes’ appears to mean that block size would be varied randomly. If yes, then block size should be a range and not a fixed number of 10.
