Reviewer's report

**Title:** Sentinel node in ovarian cancer, a phase 1 study

**Version:** 1  **Date:** 25 January 2013

**Reviewer:** Dennis S Chi

**Reviewer's report:**

There is a growing body of literature on the benefit of sentinel node sampling for gynecologic malignancies of vulva, uterine, and cervical origin. This study is a very interesting concept attempting to assess the ability to detect sentinel nodes with ovarian cancer.

1. I feel the study design will test the hypothesis.
2. There are sufficient details provided to allow replication of the work or comparison with related analyses.
3. The planned statistical analysis appropriate.
4. The writing is acceptable.

**Level of interest:** An article of importance in its field

**Quality of written English:** Acceptable

**Statistical review:** No, the manuscript does not need to be seen by a statistician.

**Declaration of competing interests:**

I declare that I have no competing interests.
