Reviewer's report

Title: A European inventory of common EHR data elements for clinical trial feasibility

Version: 2 Date: 1 October 2013

Reviewer: Eugenio Santoro

Reviewer's report:

The paper is well written and documented and related to the important issue concerning the process of standardization and use of EHR for clinical research and clinical trials. My opinion is that it can be considered for publication without any comment or suggestion.

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

No conflict of interest.
