**Title:** Towards Onset Prevention of COGnitive decline in adults with down syndrome (the TOP-COG study): study protocol for a randomised controlled trial

**Version:** 3  **Date:** 29 April 2014

**Reviewer:** Germain Weber

**Reviewer's report:**

There should be more details on how informed consent was established. E.g. have the authors used easy to read information for participants? Or did they inform only orally? How was decision-making capacity assessed? Were neuropsychological tests involved in this assessment?

**Quality of written English:** Acceptable
