Reviewer's report

Title: Participants' understanding of randomized controlled trial (RCT) through informed consent procedures in the RCT for breast cancer screening, J-START

Version: 3 Date: 5 September 2014

Reviewer: Julia Wade

Reviewer's report:

I have read the revised manuscript and the authors' response to editor and reviewer comments. Unfortunately there are still significant problems with the English leading to lack of clarity as to the authors' message. These problems occur mainly in the background and discussion.
