Reviewer's report

Title: Internet-based cognitive-behavioural self-help for the premenstrual syndrome: study protocol for a randomized controlled trial

Version: 1 Date: 22 August 2014

Reviewer: Sean Perrin

Reviewer's report:

1. Will the study design adequately test the hypothesis?
Yes - this a well designed and well-powered pilot, proof-of-concept RCT that will test the tolerability, acceptability and clinical impact of iCBT aimed at PMS/PMDD

2. Is the planned statistical analysis appropriate?
Yes.

3. Are sufficient details provided to allow replication of the work or comparison with related analyses: if not what is missing?
The manuscript is sufficiently detailed.

4. Is the writing acceptable?
This is an extremely well-written paper.
