Reviewer's report

**Title:** A Core Outcome Set for Clinical Trials on Non-Specific Low Back Pain: Study Protocol for the Development of a Core Domain Set

**Version:** 2  
**Date:** 8 December 2014

**Reviewer:** Adam Goode

**Reviewer's report:**

Thank you for the opportunity to review the entitled manuscript "A Core Outcome Set for Clinical Trials on Non-Specific Low Back Pain: Study Protocol for the Development of a Core Domain Set". The authors report on a delphi approach to the development of a core set of outcome measures for chronic low back pain. The article is very well written, organized well and describes well the process of development. I do not have any additional comments or edits for the authors.

**Level of interest:** An article whose findings are important to those with closely related research interests

**Quality of written English:** Acceptable

**Statistical review:** Yes, and I have assessed the statistics in my report.

**Declaration of competing interests:**
