Reviewer's report

Title: Lessons and implications from a mass immunization campaign in squatter settlements of Karachi, Pakistan: an experience from a cluster-randomized double-blinded controlled trial [NCT00125047]

Version: 1 Date: 23 January 2006

Reviewer: Jane N Zuckerman

Reviewer's report:

General

This is a very well presented and clearly written manuscript which address an important public health issue often overlooked in developed countries. The success of this example might encourage colleagues & others to actually implement such programmes so that the public health needs of populations in developing countries might be addressed.

重大修订要求（作者必须在决定发表前回复）

次要修正要求（如图中的标签缺失，或错误使用术语，作者可以信任的纠正）

酌情修订（作者可以选择忽略）

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
