Reviewer’s report

Title: Frontalis Suspension Surgery to Treat Patients with Essential Blepharospasm and Apraxia of Eyelid Opening - Technique and Results -

Version: 2 Date: 21 September 2014

Reviewer: Claus Pototschnig

Reviewer’s report:

The authors could treat a high number of patients in a rare disease. Excellent figures for demonstrating the surgical steps. Clear discussion about pros and cons of the technique.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
