Title: Cone-beam computed tomographic evaluation of styloid process: A retrospective study of 208 patients with orofacial pain

Version: 1 Date: 15 December 2013

Reviewer: Jorge N R Martins

Reviewer's report:

I have no change to purpose in this paper.

It is an interesting topic, with a previously unreported evaluation of the styloid process using the new CBCT technology. The study is well designed, and possible to be reproduced using the methods described in the paper. A good statistical analysis. Good discussion and interesting conclusions.

I advice accepting this paper for publication in Head & Face Medicine.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
