Reviewer's report

Title: Study on the Clinical Application of Pulsed DC Magnetic Technology for Tracking of Intraoperative Head Motion During Frameless Stereotaxy

Version: 1 Date: 1 March 2006

Reviewer: Jan Vesper

Reviewer's report:

General

------------------------------------------------------------------------------------------------------------------
Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

------------------------------------------------------------------------------------------------------------------
Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

------------------------------------------------------------------------------------------------------------------
Discretionary Revisions (which the author can choose to ignore)

What next?: Accept without revision

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
