Reviewer's report

Title: Standardization of Surface Electromyography Utilized to Evaluate Patients with Dysphagia

Version: 1 Date: 1 April 2007

Reviewer: Michael Shterenshis

Reviewer's report:

General

====================================================================================================

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

====================================================================================================

X Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Please add a chart to summarise the standards in a form of a protocol of sEMG investigation

====================================================================================================

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of outstanding merit and interest in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
