Reviewer's report

Title: Improvement of chronic facial pain and facial dyskinesia with the help of botulinum toxin application

Version: 3 Date: 21 June 2007

Reviewer: Kirsi Sipilä

Reviewer's report:

General

-----------------------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

-----------------------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

The text is still disoriented. For instance, divisions into sentences is lacking in the text. Tightening of the text would make it clearer and more understandable for the reader.

-----------------------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Needs some language corrections before being published
