Reviewer's report

Title: Schwannoma of the external auditory canal: A case report

Version: 2 Date: 8 December 2006

Reviewer: David Stickler

Reviewer's report:

General Revised article addressed all prior questions raised by the initial review

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached) none

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

Discussion: 1."Usefull" should be "useful" 2.The line beginning "Neurofibroma does not" has a grammar problem. Use either the combination "do not have" and "have a dense" or "does not have" and "has a dense" depending on the use of singular or plural neurofibroma. 3. The sentence beginning "Neurofibromas may accompany" does not make sense and needs a grammar revision.

Discretionary Revisions (which the author can choose to ignore)

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Needs some language corrections before being published
