Reviewer's report

Title: Evaluation of three dimensional stereolithographic model and cephalometric analysis in mandibular distraction osteogenesis with a multiplanar extraoral device

Version: 1 Date: 2 August 2006

Reviewer: Ki Chul Tae

Reviewer's report:

General

---------------------------------------------------------------------

Major Compulsory Revisions (that the author must respond to before a decision on publication can be reached)

---------------------------------------------------------------------

Minor Essential Revisions (such as missing labels on figures, or the wrong use of a term, which the author can be trusted to correct)

In 10 page, I recommended you have to use acronym DO at 8 and 14 row, and 'relaps' term should be substitute for 'relapse' at 4 row.

---------------------------------------------------------------------

Discretionary Revisions (which the author can choose to ignore)

---------------------------------------------------------------------

What next?: Accept after discretionary revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable
