Reviewer's report

Title: Penetrating Facial Injury from Angle Grinder Use: Management and Prevention

Version: 1 Date: 13 August 2007

Reviewer: Matthias Christian C Grieshaber

Reviewer's report:

General

Introduction:
Line 3: spell out RoSPA. Further, I would mention that the increasing number of injuries during three consecutive years (2000-2002) is alarming.

Discussion:
Paragraph 1, last line: please give a reference
Page 5, last paragraph: whether the injuries are "entirely" preventable, I do not know. What about american, australian, etc. guidelines?. I would just mention the national guidelines.

References:
ref 1: what kind of journal/report is URN ?

What next?: Accept after minor essential revisions

Level of interest: An article of importance in its field

Quality of written English: Acceptable
