Reviewer's report

**Title:** 3-D reconstruction of a human foetus with combined holoprosencephaly and synophthalmia

**Version:** 1  **Date:** 25 March 2009

**Reviewer:** Edward Araujo Junior

**Reviewer's report:**

Dear Thomas Stamm (Editor-in-Chief)

The article “3-D reconstruction of a human foetus with holoprosencephaly and synophthalmia” is very interesting and well written. It describes in detail the three-dimensional reconstruction of the cranial structures of a fetus presenting this anomaly. The rendered images have adequate quality and allow an easy comprehension of the anomaly. I have no corrections to suggest to the article itself, only in the caption of Figure 1, which should be “frontal view” (Discretionary Revision).

Kind regards,

Dr. Edward Araujo Júnior
