Reviewer's report

Title: Unilateral versus bilateral thyroarytenoid Botulinum toxin injections of in adductor spasmodic dysphonia

Version: 1 Date: 14 November 2008

Reviewer: Adam M Klein

Reviewer's report:

1. Is the question posed by the authors new and well defined? No, there are other articles in the field that address this question.

2. Are the methods appropriate and well described, and are sufficient details provided to replicate the work? Yes.

3. Are the data sound and well controlled? Yes, they seem to be.

4. Does the manuscript adhere to the relevant standards for reporting and data deposition? Yes.

5. Are the discussion and conclusions well balanced and adequately supported by the data? Yes.

6. Do the title and abstract accurately convey what has been found? Yes.

7. Is the writing acceptable? Yes.

Reviewer's report

---------------

- Minor Compulsory Revisions

Acknowledgement of previous articles with similar conclusions (i.e. Unilateral Versus Bilateral Injections of Botulinum Toxin in Patients with Adductor Spasmodic Dysphonia by Steven Bielamowicz, Sheila V. Stager, Andrea Badillo, and Alexis Godlewski)

The title needs to be corrected (the word ‘of’ needs to be removed)

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
