Reviewer’s report

Title: The nature of fibrous dysplasia.

Version: 1 Date: 9 June 2009

Reviewer: Ahmad Abdelkarim

Reviewer’s report:

1. In the first paragraph, craniofaical polyostotic FD should be mentioned.
2. Please change the word aetiology to etiology, it's more common this way.
3. In radiological features of FD description, please describe the different patterns of FD, such as orange peel, ground glass and finger print patterns, if possible

Level of interest: An article whose findings are important to those with closely related research interests

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
