Reviewer’s report

Title: A radiographic evaluation following the use of a novel cyclical force generating device in orthodontics.

Version: 1 Date: 16 May 2011

Reviewer: pavankumar vibhute

Reviewer’s report:

1st conclusion=3D CBCT images provided an excellent to view root resorbtion during orthodontic treatment.
This was not the aim or objective of study, so I am skeptical about mentioning it.

Introduction: 2nd paragraph, 2nd sentence= bone is flexible tissue: word flexible is not appropriate here, use alternative word= constantly remodeling

Last paragraph of introduction
Last word= ‘analysis’ isn’t it correct

Mention in discussion whether novel device applied cyclical force on anchor teeth or not?

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: Yes, but I do not feel adequately qualified to assess the statistics.
