Reviewer's report

Title: Photographic Protocol for Image Acquisition in Craniofacial Microsomia

Version: 2 Date: 7 December 2011

Reviewer: Thomas Stamm

Reviewer's report:

The question posed by the authors is not new but well defined. The method is appropriate and well described, and sufficient details provided to replicate the work. The discussion and conclusions are well balanced and adequately supported by the protocol. Title and abstract accurately convey what has been described.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:
