Reviewer’s report

Title: Semi-Open Rhinoplasty: A New Maxillofacial Technique.

Version: 1 Date: 17 April 2012

Reviewer: marco donto

Reviewer’s report:

Discretionary Revisions

This paper was aimed to report a new rhinoplasty technique. This technique is interesting, it seems to make the rhinoplasty easier to perform and the idea is rather refreshing. The study did not include a control group, but the authors compared their technique with respect to others existing ways to perform, to date, a rhinoplasty.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.
